Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25; 27-33, drawn to a device for measuring a thickness and a method of measuring a thickness, classified in class 356, subclass 630.
 - II. Claim 26, drawn to a device for deriving an angle, classified in class 356, subclass 138.
 - III. Claim 34, drawn to a device for deriving a wavelength, classified in class 356, subclass 326.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. In the instant case Inventions I, II, and III are independent from each other. Invention I claims a device for measuring a thickness and a method of measuring a thickness, which does not require the device for deriving an angle of Invention II and does not require the device for deriving a wavelength of Invention III. The device of Invention II does not require the device for deriving a wavelength of Invention III and does not require the device for measuring a thickness and method of measuring a thickness of Invention I. The device of Invention III does not require the angle-deriving device of Invention II and does not require the device for measuring a thickness and method of measuring thickness of Invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Art Unit: 2877

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
